3 month contract.

### Software Consultant

August 2016 - March 2017 (8 months)

Using Solidity design and implement smart chain investment platform using with a decentralized chain network. Primarily working on back-end development with some UI design as well. Mainly focused on transfer of currency on Tree algorithms

### Analyst at DMC

June 2016 - July 2016 (2 months)

Consultant for mapping and visualization of large data sets involving geographic regions in order to provide faster customer service/ solutions. This included profiling potential customers using large scale data frames that I helped organized.

---

## Education

### Clemson University

Bachelor's degree, Genetics, 2012 - 2016

**Activities and Societies:** Clemson Crew, Clemson Cinema Club, Alpha Sigma

**Clemson University**

Bachelors of Science, Biochemistry, 2012 - 2016

**Activities and Societies:** Honors Fraternity, Clemson Rowing, Clemson Environmental Club, Clemson Film Club, Clemson Premed Fraternity

### **Springboard**

Data Science

**Activities and Societies:** Programming in Python, machine learning, data storytelling, data wrangling, SQL and NoSQL database work, capstone projects involving the NBA.

---

### Honors and Awards

Eagle Scout, NBA hack-a-thon participant
